

COVID-19 ECHO Questions

I have seen in the news and community members are asking me about marijuana use and its relationship with inflammation reduction/symptoms of COVID-19. I have only seen one peer reviewed article, could you point me to more information to be able to provide to community members?

COVID-19 ECHO Questions

We are screening kids in the childcare programs, currently age 2 and up based on the age our local DOH starts screening. I have someone wanting to lower that age to include crawlers. Is there any guidance on what age to start mandatory screening in order to participate in a tribal program?

Can you speak to the Russian Vaccine Article:
<https://www.nytimes.com/2020/08/02/world/europe/russia-trials-vaccine-October.html> The candidate to be given in October is similar to a vaccine developed by Oxford University and AstraZeneca. The Russian vaccine was developed by the Gamaleya Institute in Moscow. It uses two strains of adenovirus that typically cause mild colds in humans.

COVID-19 ECHO Questions

I wonder if there could be some brief discussion about aerosols as they relate to dentistry? We practice in a fog of aerosols and it feels that the face shields are less protective for us because our patients are below us. I haven't seen any data about dentistry-related COVID exposure.

COVID-19 ECHO Questions

For patients who are scheduled for a dental procedure that requires aerosol spray (high speed handpiece or cavitron), should they be getting a COVID test before each procedure? for example if they have an appointment on Monday for a cleaning w/cavitron and get the test done that morning and then have another appointment on Wednesday for a filling is that test still good or do they have to have another test done on Wednesday also? Thank you.
