

You are invited

You are invited to participate in a COVID-19 Testing Study.

You are invited to participate in a COVID-19 Testing Study.

A Tribal Health Center will be testing 100 people that are actively working in a frontline or healthcare worker role for any business within the community.

You are invited to participate in a COVID-19 Testing Study.

A Tribal Health Center will be testing 100 people that are actively working in a frontline or healthcare worker role for any business within the community.

Fifty (50) participants are being selected from the Tribal Health Center. You are receiving this invitation because you have been identified as a frontline or healthcare worker.

To participate in the study, you must agree to:

- **Submit samples for two types of testing (nasal swab and fingerstick); and**

To participate in the study, you must agree to:

- **Submit samples for two types of testing (nasal swab and fingerstick); and**
- **Be available for testing on all three testing dates (you will be tested three times)**

Testing for tribal center employees will tentatively occur at the Tribal Medical Department on:

- Tuesday, May 12th**
- Tuesday, May 26th**
- Tuesday, Jun 9th**

Purpose of COVID-19 Testing Study

Because testing has been limited in County A and within the reservation, the rate of COVID-19 infection is unknown.

As the tribe and medical center consider reopening, we wish to estimate the current prevalence of COVID-19 infection in the community.

Things to Consider

Percent of tests that are positive (May 6, 2020)

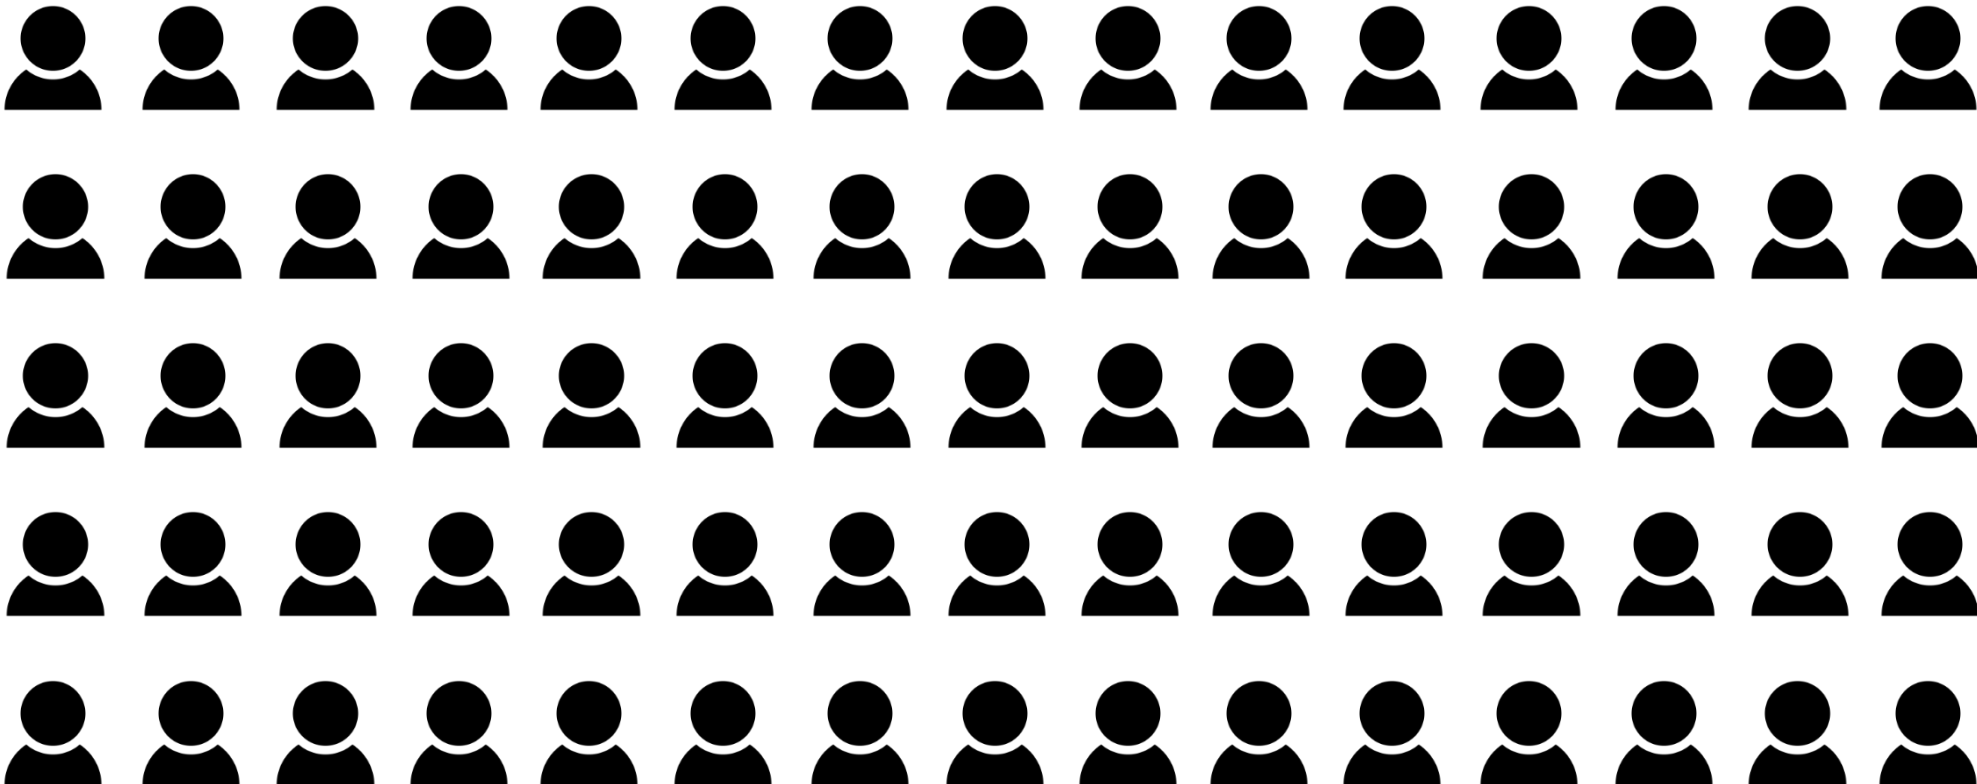

- OR 4.3%
- ID ~5.0%
- WA 7.1%

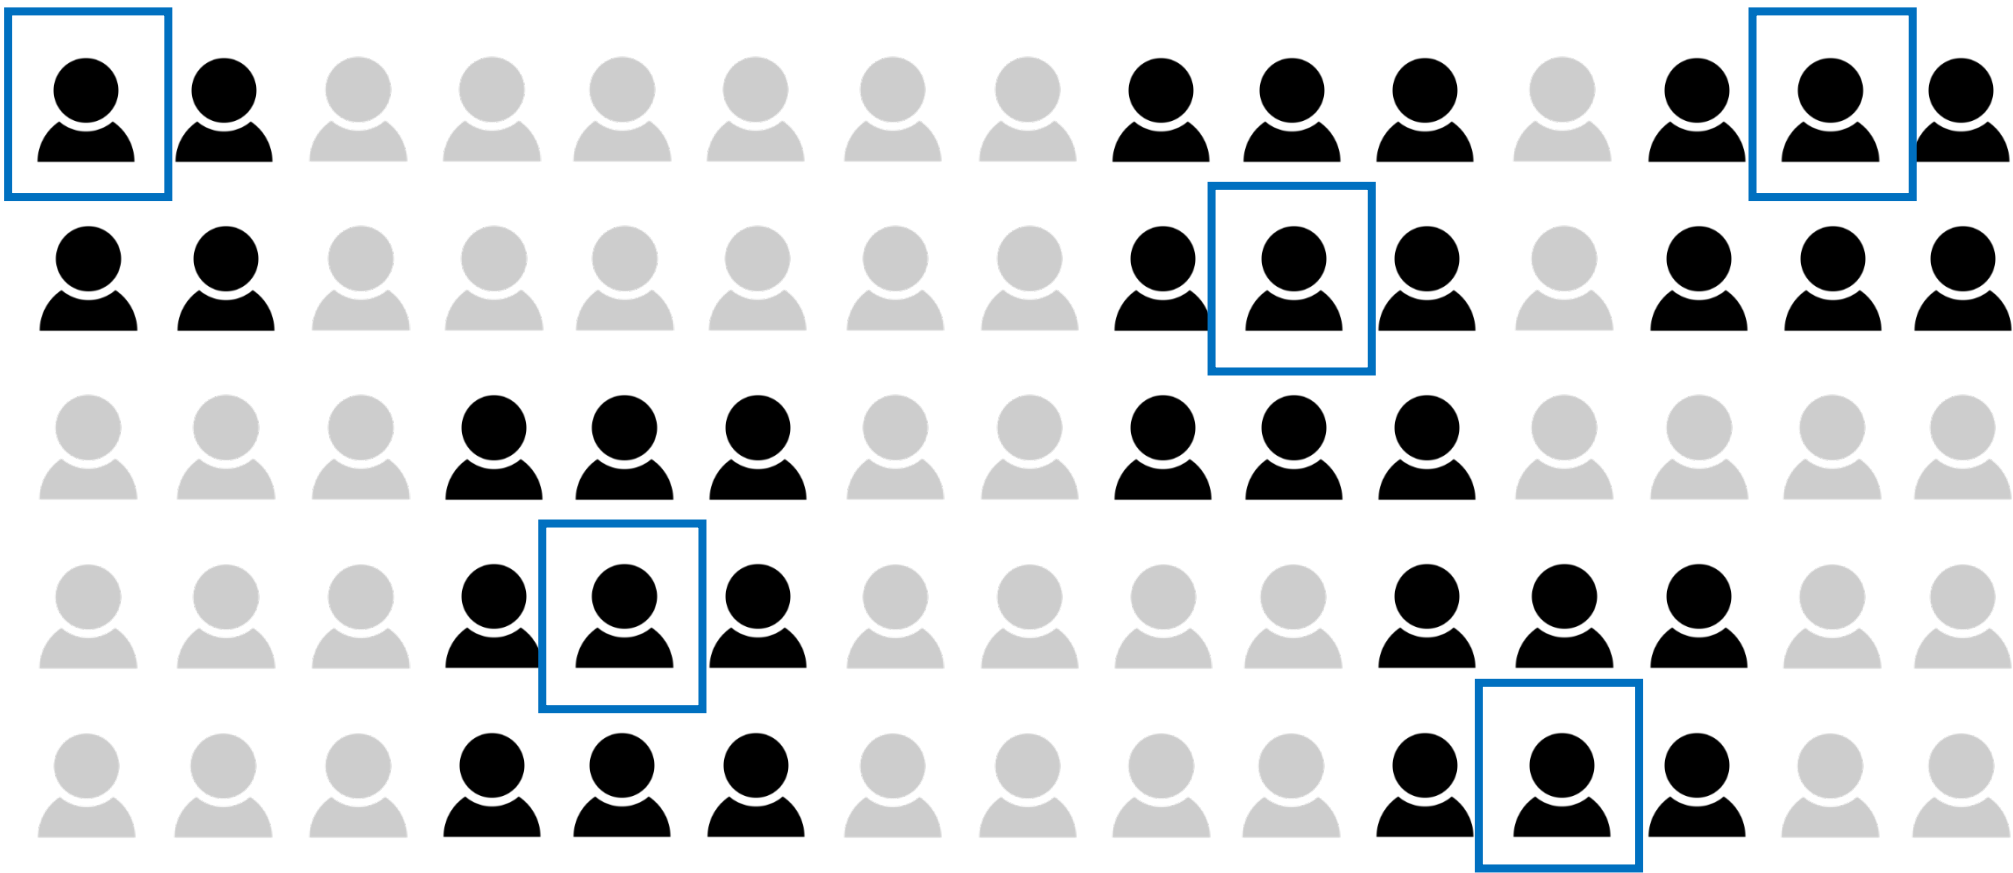

Things to Consider

Percent of tests that are positive (May 6, 2020)

- OR 4.3%
- ID ~5.0%
- WA 7.1%

Testing strategy to detect on average 1 positive would be to test at least 20 people.

Things to Consider

Testing same individuals every 2 weeks

Adequate time for incubation

Preserving testing resources

Thank You
