- For CME credit

Reminders

Session is recorded and your attendance is consent to be recorded

Recording will be made available for distribution

Please see announcement for slides

CME available after completion of evaluation

Covid-19 ICU care

Can you recommend a specific approach to proning (i.e. number of times per day, length of time, patient selection, etc.)

Covid-19 ICU care

1. Please describe optimal use of PEEP in a patient with Covid-19 associated ARDS.

2. Please explain the benefits or disadvantages of APRV vs. other ventilator mode settings in a Covid-19 patient.

Covid-19 ICU care

2. Can HFNC be safely used in a normal (non-negative) pressure room?

Covid-19 ICU care

Would you run a code on a Covid-19 patient in a non-negative pressure room? What if the patient was intubated? What if an LMA is in place?

Covid-19 ICU care

What are mortality rates for ventilated patients in older age groups? (60's, 70's, 80's, etc)

Covid-19 ICU care

For Covid-19, what data or other information do you find helpful in sharing with families of patients when having a goals of care discussion?

Thank you. Be safe and be well.
