

Systems-Based Case Recommendations

- 1. Investigate hesitations or concerns of psychiatrist as it relates to establishing a CPA**
- 2. Identify other roles that pharmacists may fill, and the direct benefits to the patient population and provider(s)**
 - a. case management; naloxone; naltrexone; medication counseling; detoxification process**
 - i. Once trust is established, expand role and services**
- 3. Discuss roles/processes in detail and develop policies and procedures together**
 - a. Probation period; tag in notes; shadow during visits**
- 4. Demonstrate clinical expertise and competency through other opportunities, including those involved with controlled substances**
- 5. Educate on current practices and advanced pharmacist roles within BOP and other agencies**
- 6. Collaborate with other BOP supervising physicians (FCC Butner provided as an example)**
- 7. Consider gaining buy-in from medical leadership first**
- 8. Emphasize collaborative care versus collaborative practice**
- 9. Our faculty of experts are available anytime via phone or email for continued support and mentorship**
