

Starting an Effective PHN/PCMH Model to End the Syndemic

CDR DAWN BENTH, RN, BSN, MBA

LCDR CASEY MARLIN, PHARMD, MHA, BCGP

LT KELSEY KROON, PHARMD, BCPS

Objectives

Summarize Steps Taken to Establish an Effective PHN/PCMH Clinic Model

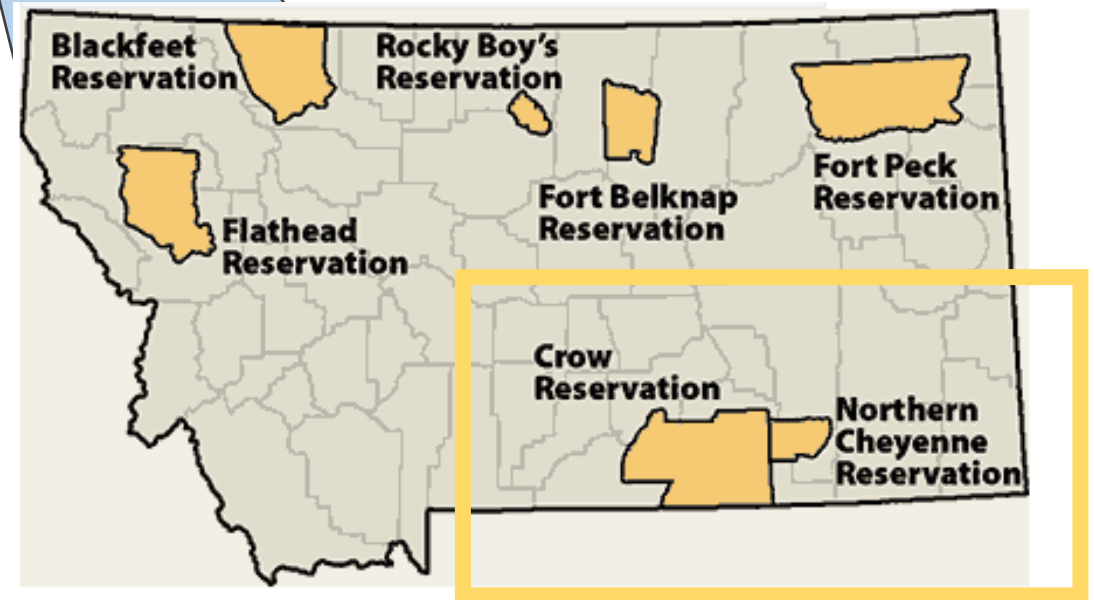

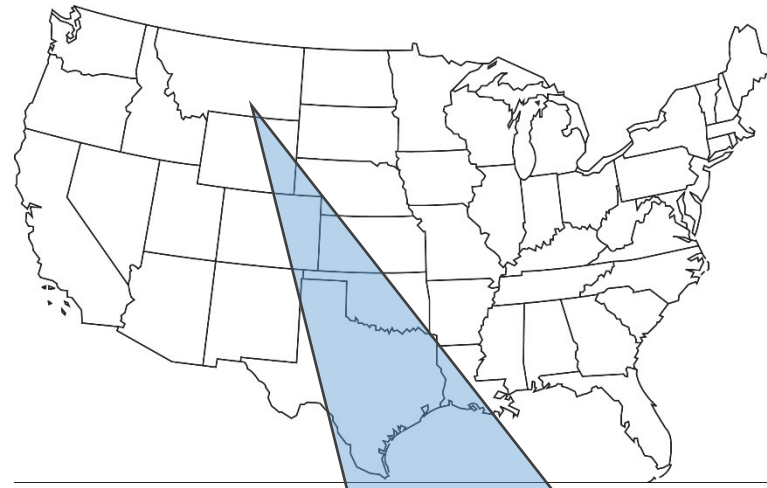

Explain Team Member Roles and Workflow

Describe Current Clinic Status and Future Goals

Our Facility

- Located on the Crow Reservation
- Main hospital in Crow Agency, MT
- Two field clinics in Lodge Grass and Pryor, MT
- Crow: ~11,200 enrolled with ~8,000 living on reservation
- Northern Cheyenne: ~11,266 enrolled and ~5,000 on reservation

Public Health Nursing/Patient Centered Medical Home Model

- HCV silo clinic progression
- Chronic Disease State PCMH management
- Detention Center Visits
- Park Visits
- Day to Day Schedule & Tasks

Detention Center Visits

- PHN staff make regular visits for STI and infectious disease screening and treatment
- Provider visits/medical clearances for transfer
- Pharmacists accompany weekly or as needed
- HCV ECHO interviews, lab draws, vaccinations, etc.
- Medications are delivered to the facility
- Detention Center medical staff is eager to assist with getting treatment to the inmates
- Immunization Administration

Park Visits

- PHN staff and pharmacists make visits to a local park to provide care to people experiencing homelessness
 - Lab draws
 - POC testing (HCV, HIV, Syphilis)
 - Narcan distribution
 - Condom distribution
 - Education

Collaborative Impact Thus Far

- Tracking 288 Hepatitis C consults
 - 44 documented cures
 - 22 pending SVR
 - 40 spontaneously cleared
- Increased the amount of Narcan (naloxone) in the community:
 - 60 doses dispensed in all of 2021
 - 133 doses dispensed from January 2022-March 2023
- Increased access to Vivitrol (naltrexone) for SUD
 - Doubled utilization of naltrexone compared to calendar year 2021
- Created/implemented STI standing order to increase timeliness to STI treatment:
 - 483 patients received treatment under standing order since May 2022.
 - Increased from 260 patients treated as of October 2022

STI Treatment Integration

- In response to Syphilis outbreak that started end of 2021
- Public Health Nursing department identified delayed initiation of treatment due to provider shortage as a barrier
- Development of Sexually Transmitted Infection Treatment and Testing Standing Order to expedite treatment

STI Standing Order

- Implemented May 2022
- Applies to individuals ages 14 and up
- Positive cases and known contacts of Gonorrhea, Chlamydia, Syphilis, and trichomoniasis vaginalis
- Patients identified and contact tracing completed by the PHN department
- Pharmacy notified and appropriate treatment is prescribed and dispensed
- PCP or Chief Medical Officer (if no PCP) co-signed to EHR note
- Patient scheduled for follow-up with a provider

Condition	Medication
Chlamydia or known contact of Chlamydia	Doxycycline 100mg PO BID x 7 Days
Uncomplicated Gonorrhea or known contact to Gonorrhea	Under 300 Pounds – 500 mg Ceftriaxone IM X1 300 Pounds and above – 1 GM Ceftriaxone IM X1 Expedited Partner Therapy – Cefixime 800mg PO once (If IM injection cannot be given)
If Chlamydia has not been excluded or co-infection of CT/GC	Under 300 Pounds – 500 mg Ceftriaxone IM X1 300 Pounds and above – 1 GM Ceftriaxone IM X1 AND Doxycycline 100mg PO BID x 7 Days
GC/CT Treatment with Cephalosporin Allergy	Gentamycin 240 mg IM AND Azithromycin 2GM PO X1
Syphilis	Penicillin G 2.4 million units IM x 1
Syphilis treatment with Penicillin Allergy (Non-pregnant)	Doxycycline 100mg PO BID x 14 Days
Syphilis treatment with Penicillin Allergy (Pregnant)	Refer to PCP for penicillin desensitization
Trichomoniasis Vaginalis	Tinidazole 2GM PO X1

Syphilis Statistically Speaking

(Nov 2021 through March 2023)

Testing

- 688 tested since Nov 2021
 - 102% increase from previous year
- RPR with confirmatory Treponema
 - 2-3 weeks for results
- Treponema Crow Lab:
 - 1 hr in-house results
- Point of Care (POC) Treponema:
 - 168 tested, 20 positive (12%)
 - 10-15 minute results

Patients

- 352 confirmed cases
 - Most have received some treatment
- Several additional cases transferred to other jurisdictions
- Many cases found were incarcerated
- Contacts can be hard to locate
 - 42% have not been located
- 10 known pregnant with syphilis
 - 3 born with syphilis, one stillborn 34 wks

On the Spot Treatment

Pharmacy Partners

- Standing orders
- Medication procurement

Med Administration Kits

- Medication
- Needles
- Bandages
- Alcohol wipes
- Investigation forms
- Sharps containers
- Epi Pens
- Gloves

On the Spot Testing

STI Test KITS

- Alcohol wipes
- Tourniquets
 - Needles
- Blood tubes
- Urine cups
 - Labels

Community/Public Health Pharmacist

What does a Community Health Pharmacist do?

- Screening and treatment for STIs, Hepatitis C and other communicable diseases
- Substance Use Disorder management and treatment
- Increased screenings and education opportunities in detention centers and school
- Patient home visits (discharge medication reconciliation, medication management, patient/family education)
- Increased access to care for homeless patients (SUD, syringe exchange program, birth control, naloxone)
- Vaccines for Children program management

Over-the-Counter Medications

- Pharmacists are able to place orders for OTC medications in their own name per policy for acute or chronic conditions
- Patients are seen on a walk in/as needed basis. No consult required.
- Face-to-face encounters preferred; proxy visit or telephone encounters allowed at pharmacist discretion
 - APAP, capsaicin cream, menthol/methyl salicylate cream, permethrin shampoo, seasonal allergy treatment, dry/itchy skin treatment, acne, sunscreen, vitamins, etc.
 - PlanB
- Assists patients in self-management of their symptoms
- Frees up provider visits for more complex issues

Naloxone Policy

- Provided to patients, family members, friends, or any other person who is in a position to assist a person at risk
 - Requestor must have an established chart
- Opioid overdose and naloxone training provided by dispensing pharmacist

Harm Reduction

- Condoms
- PrEP
- Education!
- Substance use disorder treatment info/education
- Birth control policy discussion

Next Steps & Goals

- Screen & educate 100% of incarcerated individuals at both the local detention center and county jail for HCV/HIV/STD/SUD
- Integrate substance use disorder treatment and syringe service program
- Provide mobile community screenings, education, and birth control in locations where high risk individuals congregate
- Provide HIV/HCV/STD/SUD education and resources to youth at local schools
- Pharmacy led communicable disease treatment program
- Telehealth (behavioral health) availability at detention center
- Medicaid provision of care to incarcerated inmates
